

## Ambassador visits Flinders Bioremediation

His Excellency Mr Frank Carruet, Ambassador of Belgium visited Flinders Bioremediation Pty Ltd on campus recently as part of his official visit to South Australia.

Each Ambassador/High Commissioner makes an official visit to each State and Territory during their term in Australia. The Flinders visit came about after the Ambassador specifically asked to meet with organisations involved in bio and nanotechnology in regards to developing investment

relationships between Belgium and Australia.

Flinders Bioremediation hosted His Excellency for the morning to look at Environmental Biotechnology opportunities in the waste and remediation fields. General manager of Flinders Bioremediation Dr Richard Stewart said the visit was a great networking opportunity, not only with the Belgian visitor but also with a representative from the Department of Premier and Cabinet, who accompanied the Ambassador.

*His Excellency Mr Frank Carruet, Professor Andy Ball, Ms Bev Smart (Chief of Protocol SA Department of Premier and Cabinet), Mrs Sue Tweddell (Honorary Consul of Belgium), Dr Richard Stewart and Professor David Catchside.*
